

Glass Wool

Binder free, continuous filament,
chemically resistant, glass fibre wool

Technical Data

| | |
|---------------------------------|------------------|
| Item Code: | GlassWool |
| Max Temperature Resistance (°C) | 500 °C |
| Moisture Content | <2% |
| Organic Matter Content | <0.25% |
| Colour | White |
| Packaging Type | 25kg Bags |

Characteristics

- Made from continuous, C-glass (ASTM C 163-03), 12 micron fibres.
- Chemical resistance is **Acid Class 1**, (DIN12116), **Alkali Class 2** (Din52322) and **Hydrolytic Class 3** (DIN12111)

Applications

- Noise and heat insulation - in motor vehicle silencers and mufflers and bakery ovens.
- Aquarium and swimming pool filtration.
- Window dressing, artificial cobwebs, and snow.
- In non-rot, non-decay applications such as packing and insulating.

These specifications are subject to change without notice and are sold subject to our standard conditions of sale. Products can be made to order, at different mass, thickness, and width to the above, and with roll lengths to suit your needs. The user must be satisfied that the product is entirely suitable for the purpose.
